

The quickest way to set up your own playlist download URL

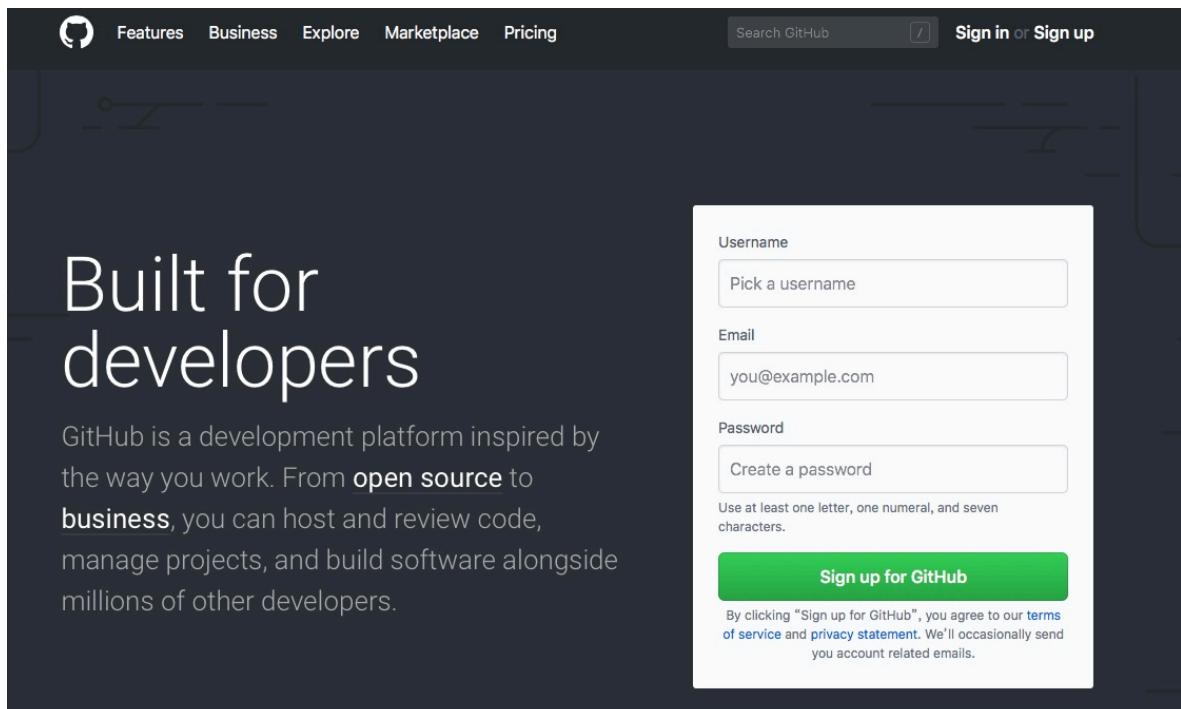

Before start, You have to finish the following work:

- (1) Your playlist files (xxx.txt or xxx.m3u) are ready.
- (2) You have a valid email.

Let's go.

Step 1

Access: <https://github.com>

Step 2

Create an account

For example:

Username: **AppleTVPlaylistFile** (you can use yourname or any words if you like) (you will use it as **Repository name in Step 6**)

Email: you@example.com

Password: xxxxxxxxxxxxxxxxxxxx

[Click Sign up for GitHub](#)

Welcome to GitHub

You've taken your first step into a larger world, @!

 Completed Set up a personal account	 Step 2: Choose your plan	 Step 3: Tailor your experience
--	---	--

Choose your personal plan

Unlimited public repositories for free.

Unlimited private repositories for \$7/month. ([view in CNY](#))

Don't worry, you can cancel or upgrade at any time.

[Help me set up an organization next](#)
Organizations are separate from personal accounts and are best suited for businesses who need to manage permissions for many employees.
[Learn more about organizations](#)

[Send me updates on GitHub news, offers, and events](#)
Unsubscribe anytime in your email preferences. [Learn more](#)

[Continue](#)

Both plans include:

- ✓ Collaborative code review
- ✓ Issue tracking
- ✓ Open source community
- ✓ Unlimited public repositories
- ✓ Join any organization

[Click Continue](#)

Welcome to GitHub

You'll find endless opportunities to learn, code, and create, @!

 Completed Set up a personal account	 Step 2: Choose your plan	 Step 3: Tailor your experience
--	---	---

How would you describe your level of programming experience?

- Very experienced Somewhat experienced Totally new to programming

What do you plan to use GitHub for? (check all that apply)

- Design Research Development
 School projects Project Management Other (please specify)

Which is closest to how you would describe yourself?

- I'm a professional I'm a hobbyist I'm a student
 Other (please specify)

What are you interested in?

e.g. tutorials, android, ruby, web-development, machine-learning, open-source

[Submit](#) [skip this step](#)

Step 3

Click [Skip this step](#)

Step 4

Click [New repository](#)

Please verify your email address

Before you can contribute on GitHub, we need you to verify your email address.
An email containing verification instructions was sent to [lom](#).

Didn't get the email? [Resend verification email](#) or [change your email settings](#).

GitHub

Step 5

Login in your email to [Verify](#) your email address.

You will see an email from GitHub.

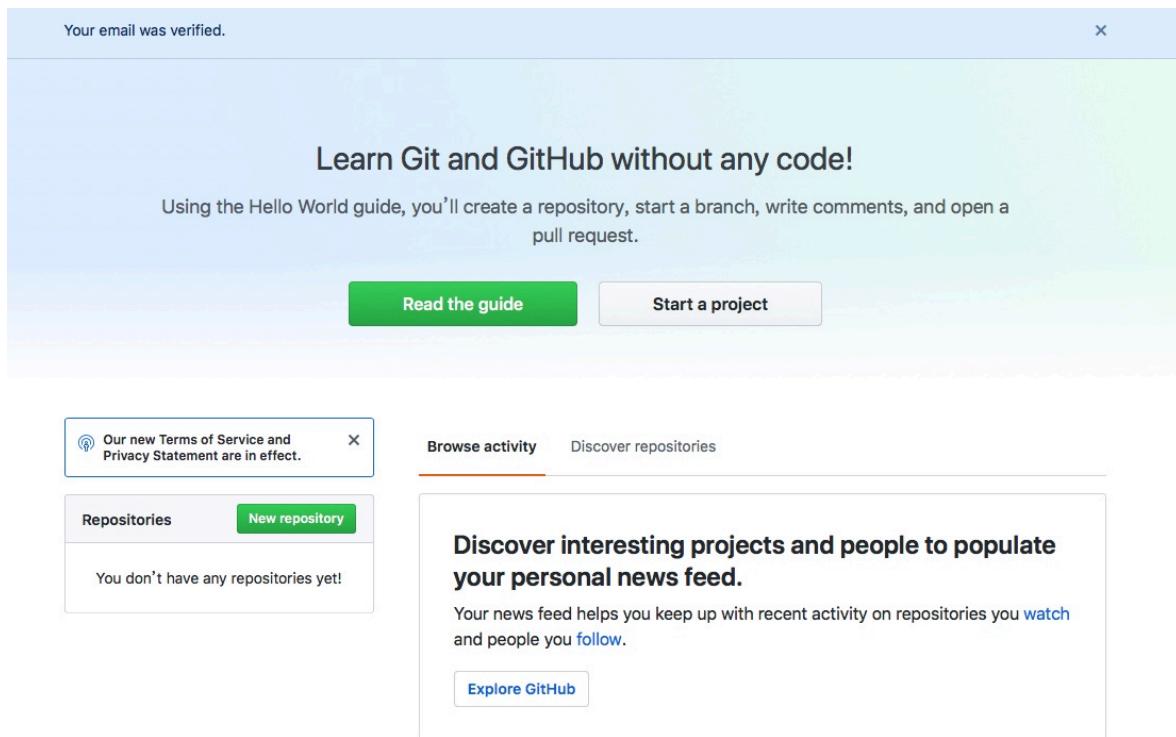

Open it, Click [Verify email address](#)

Help us secure your GitHub account by verifying your email address to unlock GitHub's features.

[Verify email address](#)

Then, GitHub Page will change

Step 6

Again, Click [New repository](#)

Create a new repository

A repository contains all the files for your project, including the revision history.

Owner Repository name

 / AppleTVPlaylistFile 

Great repository names are short and memorable. Need inspiration? How about [animated-journey](#).

Description (optional)

 **Public**
Anyone can see this repository. You choose who can commit.

 **Private**
You choose who can see and commit to this repository.

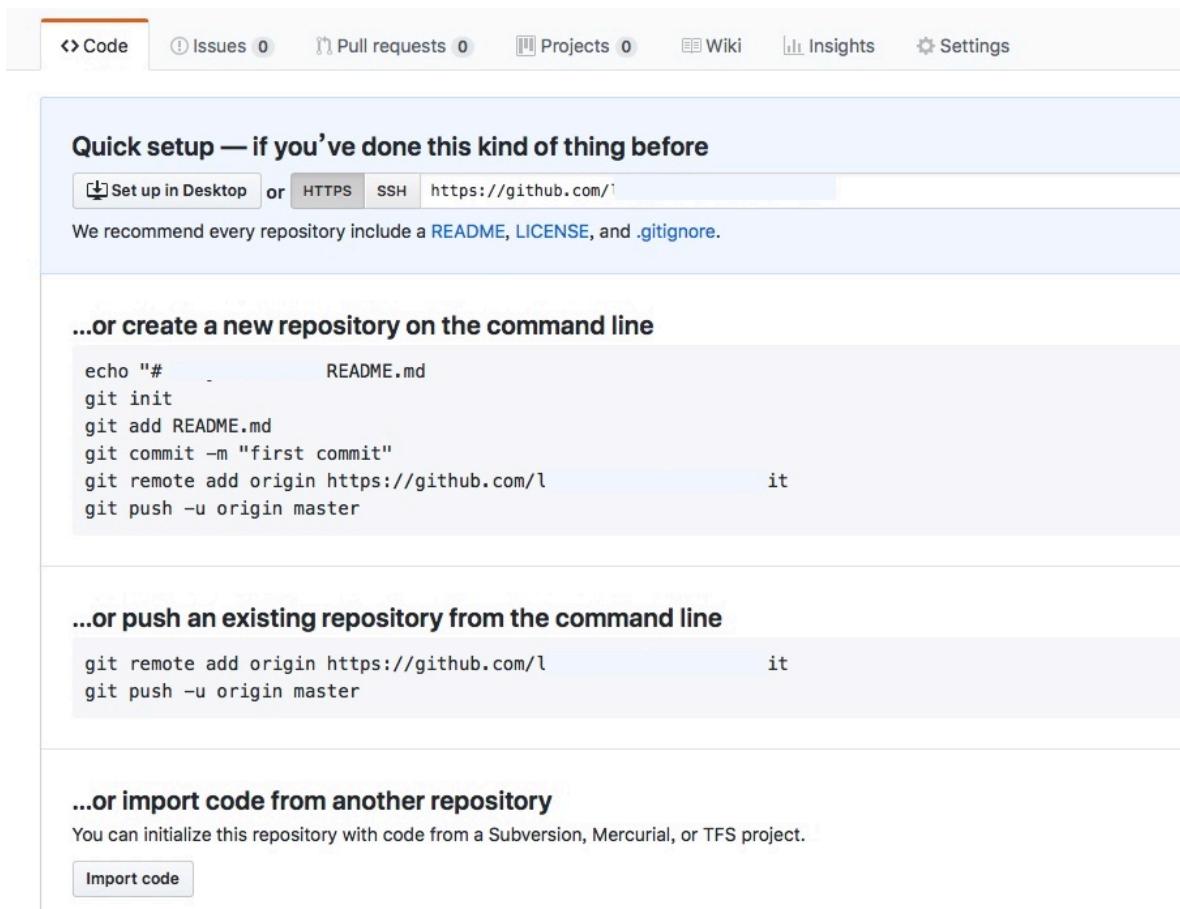

Initialize this repository with a README
This will let you immediately clone the repository to your computer. Skip this step if you're importing an existing repository.

Add .gitignore: **None** | Add a license: **None** 

Create repository

Fill **Repository name** with **AppleTVPlaylistFile**, just the SAME AS your GitHub Username. (Yes, you can use other words if you like.)

Click **Create repository**

The screenshot shows the GitHub repository setup interface. At the top, there are navigation links: Code, Issues (0), Pull requests (0), Projects (0), Wiki, Insights, and Settings. Below these, a section titled "Quick setup — if you've done this kind of thing before" provides options to "Set up in Desktop" or "HTTPS" (selected) or "SSH". It also includes a link to "https://github.com/l". A note says "We recommend every repository include a README, LICENSE, and .gitignore." Below this, sections for "...or create a new repository on the command line" and "...or push an existing repository from the command line" show sample Git commands. The "Create repository" button is visible at the bottom.

Quick setup — if you've done this kind of thing before

[Set up in Desktop](#) or [HTTPS](#) [SSH](#) <https://github.com/l>

We recommend every repository include a [README](#), [LICENSE](#), and [.gitignore](#).

...or create a new repository on the command line

```
echo "#          README.md\ngit init\ngit add README.md\ngit commit -m "first commit"\ngit remote add origin https://github.com/l           it\ngit push -u origin master
```

...or push an existing repository from the command line

```
git remote add origin https://github.com/l           it\ngit push -u origin master
```

...or import code from another repository

You can initialize this repository with code from a Subversion, Mercurial, or TFS project.

[Import code](#)

Step 7

Click [Settings](#)

Find the [GitHub Pages](#)

GitHub Pages

GitHub Pages is designed to host your personal, organization, or project pages from a GitHub repository.

Source

GitHub Pages is currently disabled. You must first add content to your repository before you can publish a GitHub Pages site. [Learn more](#).

[None ▾](#)

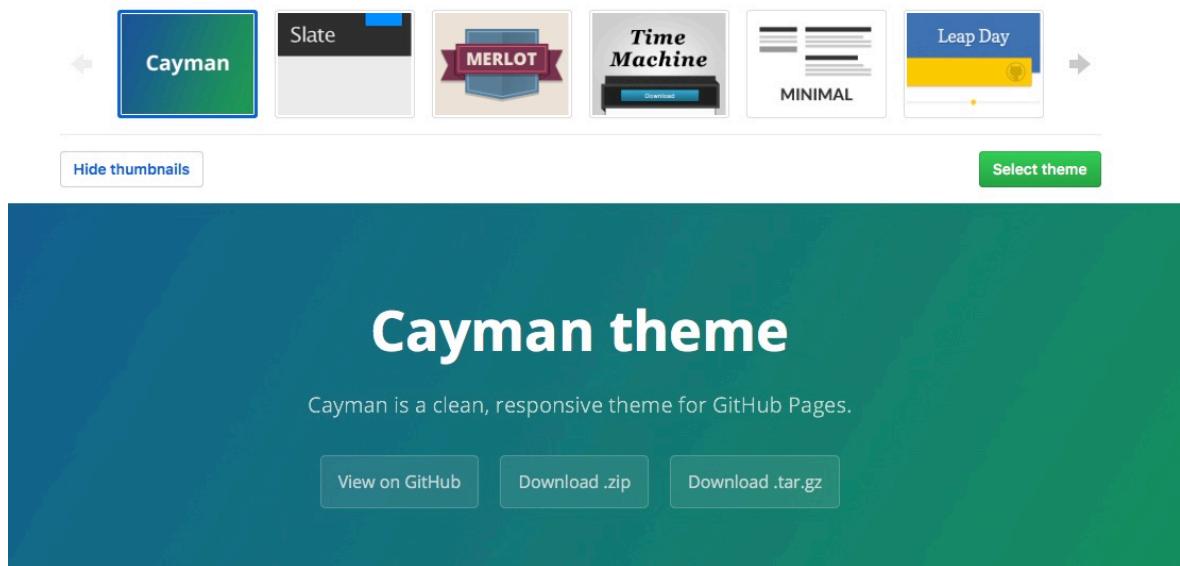

[Save](#)

Theme Chooser

Select a theme to publish your site with a Jekyll theme using the `master` branch. [Learn more](#).

[Choose a theme](#)

Click [Choose a theme](#)

Select the default theme (Cayman), Click [Select theme](#)

You will see the following pages that you can edit.

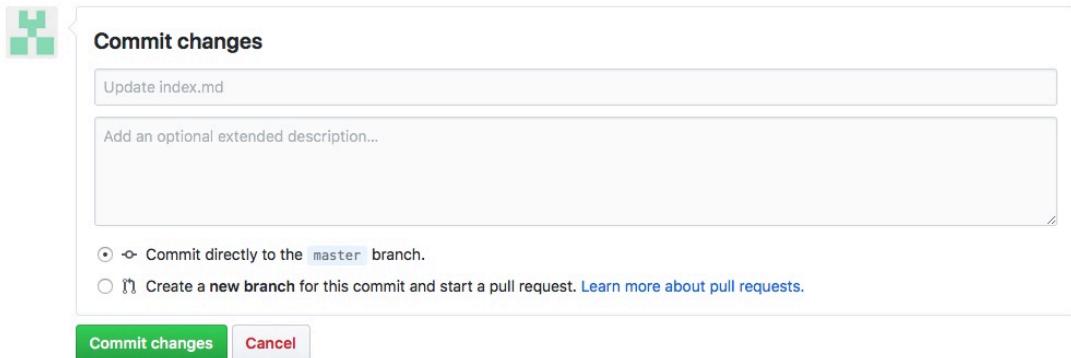

The screenshot shows the GitHub Pages editor interface. At the top, there are buttons for Watch (0), Star (0), and Fork (0). Below that is a navigation bar with links for Code, Issues (0), Pull requests (0), Projects (0), Wiki, Insights, and Settings. A search bar contains the path '/index.md'. The main area is titled 'Edit file' and shows the following Markdown code:

```
1 ## Welcome to GitHub Pages
2
3 You can use the Editor on GitHub(https://github.com/leijianan/leijianan/edit/master/index.md) to maintain and preview the content for your website in Markdown files.
4
5 Whenever you commit to this repository, GitHub Pages will run Jekyll(https://jekyllrb.com/) to rebuild the pages in your site, from the content in your Markdown files.
6
7 ### Markdown
8
9 Markdown is a lightweight and easy-to-use syntax for styling your writing. It includes conventions for
10
11 `markdown`  
Syntax highlighted code block
12
13
14 # Header 1
15 ## Header 2
16 ### Header 3
17
18 - Bulleted
19 - List
20
21 1. Numbered
22 2. List
23
24 **Bold** and _Italic_ and `Code` text
25
26 [Link](url) and 
27
28
```

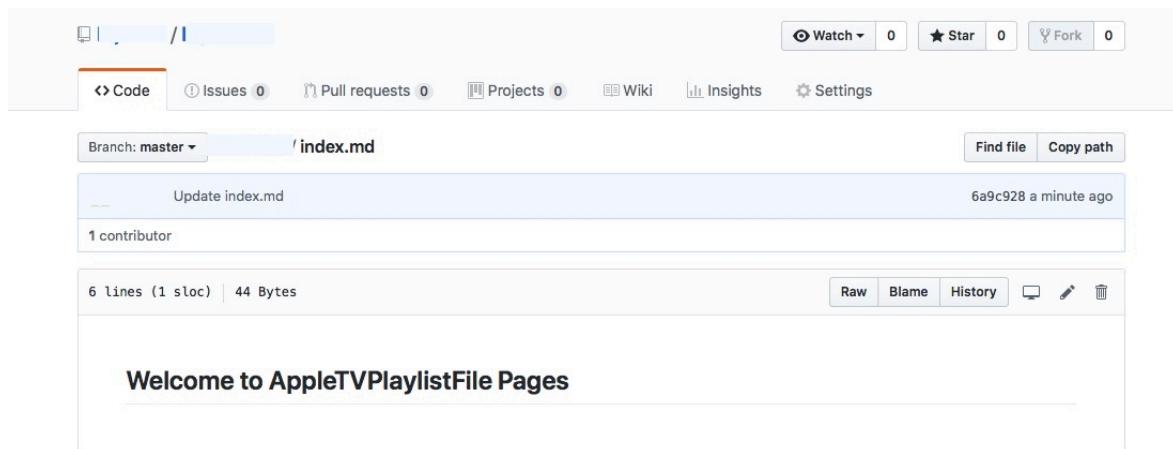

You can delete all these lines, then enter some words as below.

The screenshot shows the GitHub Pages editor interface with a blank 'index.md' file. The code area is empty, containing only the file's name and the 'Edit file' and 'Preview changes' buttons.

You have your own webpage! Just one line.

Click **Commit changes**, you will see the following page.

Step 8

Click your Username on the top left corner, back to the home page.

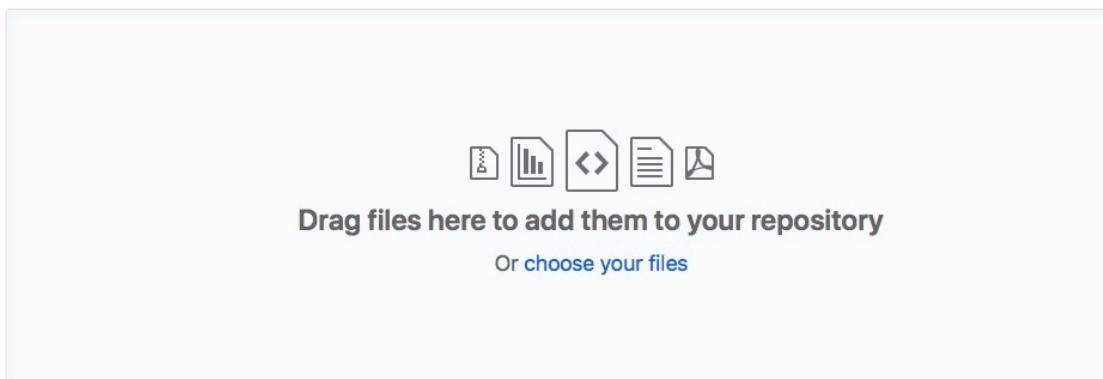

In **Popular repositories**, you will see **AppleTVPlaylistFile**, Click it, you will go to the last Step.

The screenshot shows a GitHub user profile. At the top right, there's a 'ProTip!' message: 'Updating your profile with your name, location, and a profile picture helps other GitHub users get to know you.' with a 'Edit profile' button. Below the header, there's a navigation bar with 'Overview' (highlighted), 'Repositories 1', 'Stars 0', 'Followers 0', and 'Following 0'. A section for 'Popular repositories' is shown, followed by a link to 'Customize your pinned repositories'. The main content area features a '4 contributions in the last year' chart from July 2018 to June 2019, with a legend for 'Less' (light gray), 'More' (dark green), and 'More' (dark green). Below the chart, there's a 'Contribution activity' section with a 'Jump to' dropdown set to '2018'.

Step 9 - Upload playlists to your website.

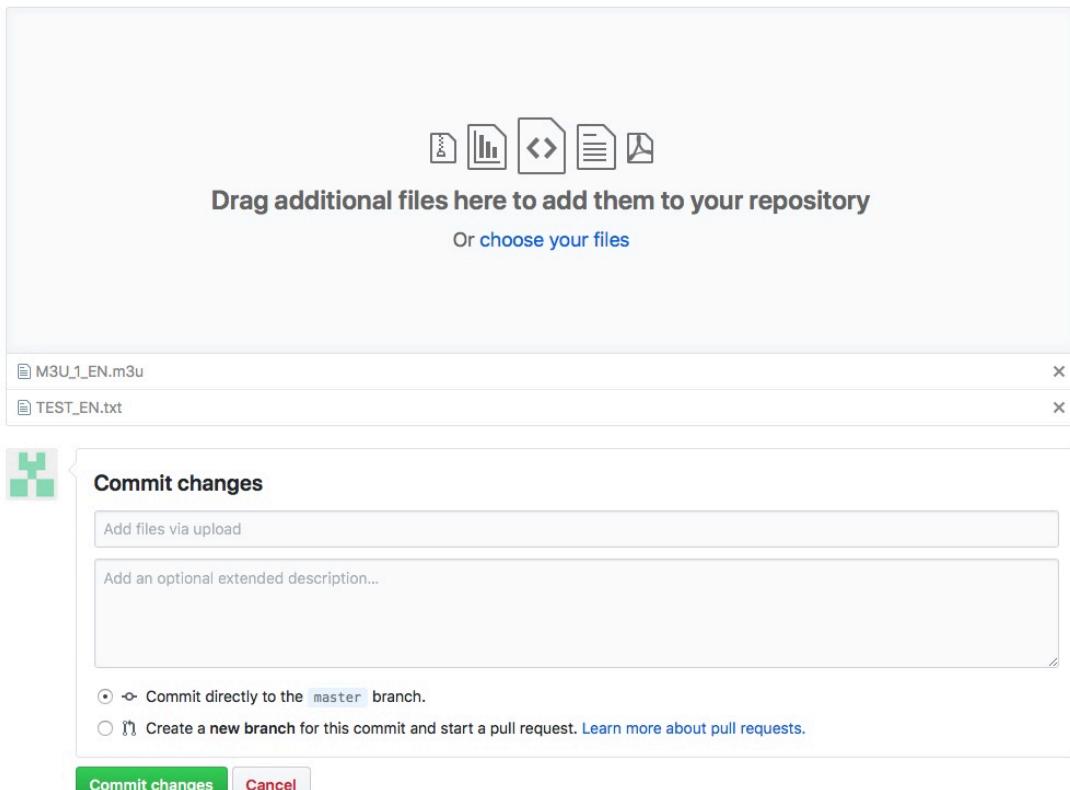

The screenshot shows a GitHub repository page. At the top, it says 'No description, website, or topics provided.' with an 'Edit' button. Below that is a 'Add topics' button. The repository stats are: 2 commits, 1 branch, 0 releases, and 1 contributor. The 'Branch: master' dropdown is set to 'master'. There are buttons for 'New pull request', 'Create new file', 'Upload files', 'Find file', and 'Clone or download'. The commit history shows three commits: one by 'ate index.md' (latest commit 6a9c928 11 minutes ago), one by '_config.yml' (Set theme jekyll-theme-cayman 26 minutes ago), and one by 'index.md' (Update index.md 11 minutes ago). At the bottom, there's a note: 'Help people interested in this repository understand your project by adding a README.' with a 'Add a README' button.

Click Upload files

A screenshot of a "Commit changes" dialog box. It features a green square icon with a white cross and a plus sign. The title "Commit changes" is at the top. Below it is a "Add files via upload" button. A text input field contains the placeholder "Add an optional extended description...". At the bottom, there are two radio button options: one selected with the text "Commit directly to the master branch." and another unselected with the text "Create a new branch for this commit and start a pull request. Learn more about pull requests.". At the very bottom are two buttons: a green "Commit changes" button and a red "Cancel" button.

Click [choose your files](#)

Choose your xxx.txt and xxx.m3u playlists to upload, after upload finished, Click **Commit changes**.

The screenshot shows the GitHub repository page. At the top, there are buttons for "Branch: master", "New pull request", "Create new file", "Upload files", "Find file", and "Clone or download". Below this is a list of files: "M3U1_EN.m3u", "TEST_EN.txt", ".config.yml", and "index.md". To the right of each file is its status ("Add files via upload") and the time of the latest commit ("just now" for all). Below the file list is a message: "Help people interested in this repository understand your project by adding a README." and a green "Add a README" button.

The files xxx.txt and xxx.m3u will show in the page.

oh, Yes, your playlists download URLs are:

https://AppleTVPlaylistFile.github.io/AppleTVPlaylistFile/TEST_EN.txt
<https://AppleTVPlaylistFile.github.io/AppleTVPlaylistFile/>

M3U_1_EN.m3u

Your WebPage is

<https://AppleTVPlaylistFile.github.io/AppleTVPlaylistFile/>

Check URLs with
Safari, if it's all
right, 😂, if not,
😭.

All Done.
